***Target America: Opening Eyes to the Damage Drugs Cause***  
**Making Connections A**

1. What plant is used to produce opium & heroin? Name two countries that grow large quantities of this plant.
2. What drug is primarily produced in clandestine laboratories in the Netherlands?
3. Name one way that drugs are smuggled into the U.S.
4. How many deaths per year in the U.S. result in automobile accidents where the driver is under the influence of drugs or alcohol?
5. What part of the body is most affected by drug abuse and is also involved in addiction?
6. In addition to law enforcement, what are the other components of the *Breaking the Cycle* portion of the exhibit address drug abuse?
7. Which natural chemical in the brain (or neurotransmitter) does LSD resemble?
8. The exhibit contains a cocaine production lab. What country did it come from?
